Curriculum of Excellence in Neonatology: Neonatal Neurology

OBJECTIVES

IPOKRATES seminars provide high-quality postgraduate education that enable professionals to keep abreast of the most recent developments, and offer participants the opportunity to discuss clinical problems or scientific issues personally with international experts. This seminar focuses on understanding, clinical assessment and management of neurological disorders in the neonatal period. Topics include new developments in neonatal neurology, particularly in the field of imaging of the newborn brain, diagnostic and therapeutic management of seizures, and neonatal brain injury. Participants are encouraged to submit a case to present for discussion.
